EDUCATION

Master of Computer Applications(MCA)

Bhadrak Autonomous College, Odisha, India

April 2026

Latest SGPA: 8.67

SKILLS

Programming Languages: Python

Web Technologies: HTML, CSS

AI & Machine Learning: Generative AI, Agentic AI, RAG, LLMs

Frameworks & Tools: FastAPI, LangChain, LangGraph, Git, GitHub, Ollama

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Effective Communication, Adaptability, Time Management

WORK EXPERIENCE

Generative AI Intern - INFOTACT Solutions

March 2026 – June 2026

- Worked on AI-powered applications using Generative AI and Agentic AI concepts.
- Developed intelligent multi-agent workflows for automated document review and content generation systems.
- Collaborated on project development, testing, debugging, and deployment processes.

Web Designing Intern - Techwebster,Remote

February 2026 – Present

- Conducted quality assurance testing to identify and resolve design issues, enhancing overall design integrity.
- Collaborated with designers to create user-friendly web layouts.

PROJECTS

Multi-Agent AI Document Evaluation Platform — Generative AI Research Intern [LINK](#)

- Built an AI-powered document evaluation system using multi-agent workflows to analyse, review, and provide intelligent feedback on documents. Developed automated assessment and review processes using Python, FastAPI, LangGraph, Generative AI, Agentic AI, Large Language Models, Prompt Engineering, REST APIs, Pydantic, Git, and GitHub.

Generative AI Marketing Content Engine — Generative AI Research Intern [LINK](#)

- Developed an AI-driven content generation platform for creating marketing copy, social media captions, and campaign content using LLM-powered workflows with Python, FastAPI, Generative AI, Agentic AI, LangGraph, Prompt Engineering, OpenAI API, Celery, Redis, REST APIs, Git, and GitHub.

RAG-Based Intelligent AI Chatbot — Generative AI Research Intern [LINK](#)

- Developed a domain-specific AI chatbot using LangChain, FastAPI, and OpenAI GPT models with Retrieval-Augmented Generation for context-aware responses and automated customer support workflows.

TRAINING

Naresh I Technologies, Hyderabad — Python with Generative AI & Agentic AI 2026

- Completed training in Python, Generative AI, Agentic AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, and AI application development.
- Gained hands-on experience with modern AI frameworks, intelligent system design, and real-world AI project development.

ACHIEVEMENTS

Sports Volunteer Leader 2025

- Led and coordinated student volunteers during college sports events and activities.
- Managed event planning, participant coordination, and team communication effectively.
- Demonstrated leadership, teamwork, and organizational skills in conducting successful sports programs.
